

Referral to “Intensified Behavior Support Services”

Example Description:

“If Chad has another aggressive outburst resulting in physical attack on a peer or adult, or any other serious code of conduct violation, this IEP team authorizes IBSS services in lieu of disciplinary proceedings.”

Service:

Chad will spend from 1-4 days receiving services to identify:

1. Causal relationships(s) between current behavior and environmental conditions present at the time of the incident.
2. Determination of the function of this problem behavior for Chad
3. Alternative behaviors Chad feels may be available for future use in similar situations.

Chad will be returned to his current classroom settings after these goals have been reached and deescalation is felt to be complete. During the intensified behavior support service, Chad will receive FAPE (Free Appropriate Public Education---his general education curriculum) with all supports and services (currently, speech language services and behavior support techniques/strategies) delivered in _____ setting, located at _____. Mr/Ms. _____ will supervise, teach and debrief with Chad and will provide a report, for IEP team review, of any behavior support plan change recommendations, at the completion of this service.

- C Note, if more than 2 IBSS services are required in a calendar year for serious breaches of district behavior code violations, the IEP team has determined there is a need to meet to reconsider this student's needs, services, and placement options and need for further disciplinary actions. This IBSS is NOT a specific disciplinary procedure, such as in-school or out-of-school suspension, and will not be recorded as a disciplinary proceeding. This service is an extension of the existing Behavior Support Plan. This intensified service is specifically available to further refine behavior support planning that will result in alternative positive behavior for this student to meet his/her needs.
